Newsletters

Safety Assist is sponsored by WorkSafe Victoria and is supported by the Transport Workers Union and the Victorian Transport Association.

The project aims to improve reduce the incidents and severity of workplace injuries, specifically those arising from manual handling and loading and unloading activities in the Short Distance Road Freight industry

The project will -

- ✓ Develop design and engineering solutions for manual handling, slips and fall risk
- ✓ Share solutions across the industry
- ✓ Develop policies and procedures with employers and clients, including government agencies to address chain of responsibility obligations
- ✓ Ensure access to guidance material to support improvements in OHS
- ✓ Improve competence in managing OHS across the industry

What's in it For Me?

Through the Safety Assist program employers can -

- ✓ Receive funding to have your OHS management assessed by an expert consultant
- ✓ access significant subsidies to implement engineering controls for identified workplace hazards.
- ✓ Participate in part funded training for Senior managers
- ✓ Receive information on the latest risk control solutions in their industry
